

# ANNUAL *Giving* APPEAL

2026

Supporting current and future generations of Paddy boys

## FROM THE CHAIR

Through this year's Annual Giving Appeal, we are seeking your support for two initiatives that will make a lasting difference at St Patrick's College – scholarships for Indigenous students and the refurbishment of the College's outdoor basketball courts.

Donations to both projects are tax-deductible, and we encourage all members of our community to consider a gift, of any size, in support of these worthwhile projects.

Mr Bradley Fenner  
St Patrick's College Foundation Chair

### FOUNDATON SCHOLARSHIPS

Help students who might not otherwise have the opportunity to attend St Patrick's. Make a tax-deductible donation to our **Endowed Scholarship Fund for First Nations students.**

Scan to donate

St Patrick's College has proudly educated hundreds of First Nations students, whose contributions have enriched our College community and strengthened our understanding of culture, identity and connection to Country.

To honour this legacy and create opportunities for future generations, the Foundation is establishing an endowed scholarship fund for First Nations students.

Donations will provide ongoing financial support, helping young Indigenous men access an education and thrive as hope-filled, confident and compassionate leaders in their communities.

### BUILDING FUND

Your tax-deductible gift helps maintain and improve our facilities, supporting current and future students with new and upgraded learning environments, such as the upgrade to our outdoor basketball courts.

Scan to donate

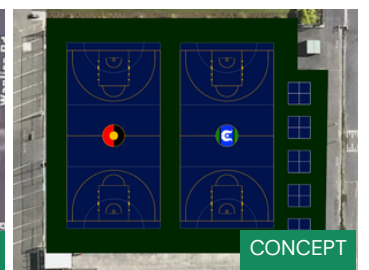

This year's Giving Appeal will support the redevelopment of our outdoor basketball courts - an important space where students gather to play, connect and build community each day.

The project will include resurfacing and upgrading the existing courts to create a safer, high-quality facility that can be enjoyed by current and future generations of Paddy boys.

Looking ahead, we also hope to further enhance the space with the addition of a protective cover, allowing for greater year-round use in all weather conditions.
